

Anti-Aging Treatment Starter Kit

The key to building patient trust in product efficacy

What is included in the kit?

The NOON™ Anti-Aging Treatment Starter Kit includes a 3-4 week home care regimen to further support and enhance the results of professional in-clinic treatments.

This highly efficacious treatment kit not only prepares the skin for professional in-clinic treatments, but also paves the way to improving the skin concerns related to aging such as uneven skin texture and tone, loss of hydration and firmness, and the formation of fine lines and wrinkles.

The Anti-aging treatment aims to stimulate skin rejuvenation, firm the skin and even out the skin tone. It also helps to strengthen the skin's barrier, increasing elasticity and moisture levels in the skin. Ultimately, the treatment aims to reduce the depth of existing wrinkles, and the appearance of new ones.

The kit includes potent paraceutical elements such as Retinol, AHA and bio-mimetic Peptides.

Anti-Aging Treatment – A 360° Approach to Success

Aging is the result of the accumulation of intracellular defects and damages resulting in the changes of the skin tissue structure. Many factors, both internal and external, are associated with skin aging such as genetics, UV radiation, pollution and smoking.

An effective anti-aging treatment requires a targeted approach, combining treatments at the clinic, and the use of active ingredients at home by the patient.

Without a home care regimen complementary to in-clinic treatments, it is not possible to significantly improve the skin function and structure.

Who is this kit for?

Many patients who are looking to prevent and/or correct the effects of skin aging have experienced disappointment after using products that promise to address their specific concerns, and are not in any hurry to purchase a new anti-aging treatment series.

The NOON™ Anti-Aging Starter Kit was developed with the professional in mind to strengthen patient trust in regards to active ingredients and treatment recommendations, all at a relatively low cost.

This advanced starter kit includes a 3-4 week treatment regimen designed to deliver significant results.

The kit includes products with active ingredients tailored to treat the effects associated with skin aging.

NOON™ DermShield™ Technology enables us to develop a paraceutical skincare portfolio that contains active ingredients at breakthrough high concentration levels without common side effects, such as irritation, burning, redness, and unpleasant sensation.

Using the NOON Anti-Aging Treatment Starter Kit:

Morning

1

Lift & Whitening Peptide Complex

- Bio-mimetic peptides activates dermal rebuilding pathways
- Firming effect
- Reduces wrinkle depth
- Whitening boost provided by specific peptide
- Increases moisture levels
- Enhances elasticity

2

In-Depth Filler Serum

- Reduces the appearance of fine lines and wrinkles
- Stimulates and supports collagen production
- Protects from elastin damage
- Includes regulatory peptide for hyaluronic acid production
- Improves skin density

3

In-Depth Filler Cream

- Reduces the appearance of fine lines and wrinkles
- Acts as a lipofiller
- Restores hydration in aged skin cells
- Increases skin barrier function

Evening

1

Retinol Charisma 0.3%

- Rejuvenating
- Firms and brightens
- Refines skin texture
- Combats photoaging
- Balances sebum secretions

2

LactoCeramide -15

- Stimulates cell turnover providing powerful rejuvenation
- Improves texture and skin tone
- Reduces the appearance of fine lines and wrinkles
- Improves water retention and moisture levels

wait for absorption

3

In-Depth Filler Cream

- Reduces the appearance of fine lines and wrinkles
- Acts as a lipofiller
- Restores hydration in aged skin cells
- Increases skin barrier function

This treatment is safe for all Fitzpatrick Skin Types, without irritation or photosensitivity.
